SCF Senegal Pilot – Lessons Learned workshop

Results of verification and certification

8 November 2019

SCF Verification results

- Verification Report Template and Verification Guidance approved by TC in February 2018 and uploaded to COMNACC website
- Verifier contracted by World Bank in October 2018, as part of support to pilot
 - TÜV Nord, one of the most well known auditors under the CDM
- Site visit by Verifier team in January 2019 – Dakar and Comasel offices
- After site visit and submission of initial findings by verifier, multiple rounds of queries and visits to Comasel offices by consultants to revise data analysis and improve Monitoring Report

Standardized Crediting Framework Senegal Pilot: Verification Report Template for Rural Electrification

Version history

Version	Date	Contents revised
1.0	02/02/2018	Initial adoption

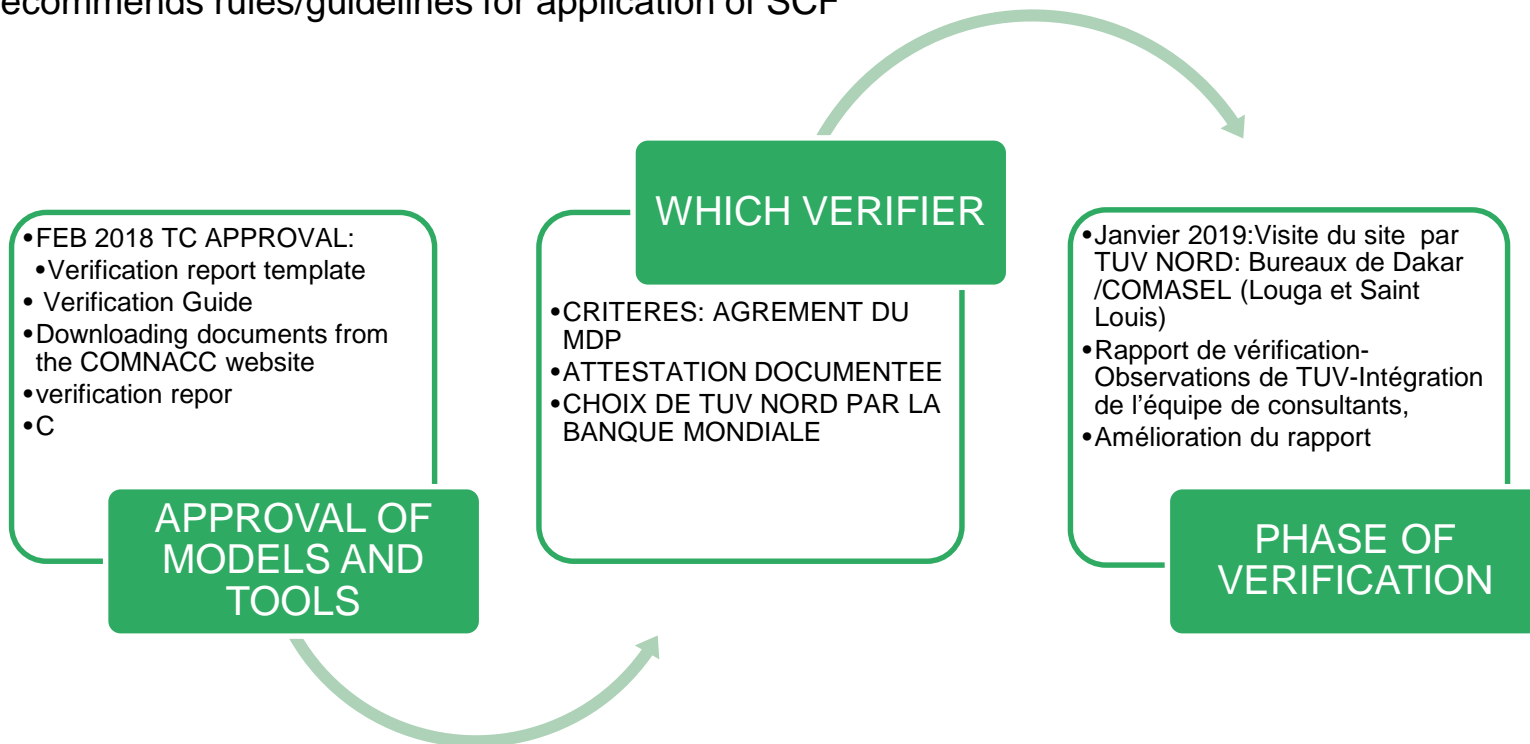

Table of Contents

1. General Program Information.....	2
2. Verifier information.....	2
3. Conclusion of verification and level of assurance.....	3
4. Overview of verification results.....	3
5. Authorized signature.....	4
6. Verification team and other experts.....	5
7. Objectives and scope of verification.....	5
8. Means of verification, findings and conclusions based on reporting requirements.....	6
8.1 Compliance of the program implementation with requirements in the listing template and applied methodology.....	6
8.2 Implementation as per the Listing Template.....	6
8.3 Compliance of calibration frequency and correction of measured values with related requirements.....	6
8.4 Assessment of data and calculation of emission reductions.....	7
8.5 Assessment of avoidance of double registration.....	7

Role of Technical Committee in process

Evaluates role of SCF for NDC implementation

- Recommends approval of SCF program documents and templates (methodologies, monitoring, verification, eligible auditors, etc)
- Recommends rules/guidelines for application of SCF

SCF Verification results

- Verifier also conducts internal technical review of final submission
- Final Verification Report with positive results received in October 2019
 - Also included Findings Report showing how all queries had been addressed and “closed out”
- Verification Report confirms 5,198 tCO₂ in emission reductions during monitoring period

SCF VERIFICATION FINDINGS REPORT

- 1ST PERIODIC -

AGENCE SENEGALAISE D'ELECTRIFICATION RURALE (ASER)

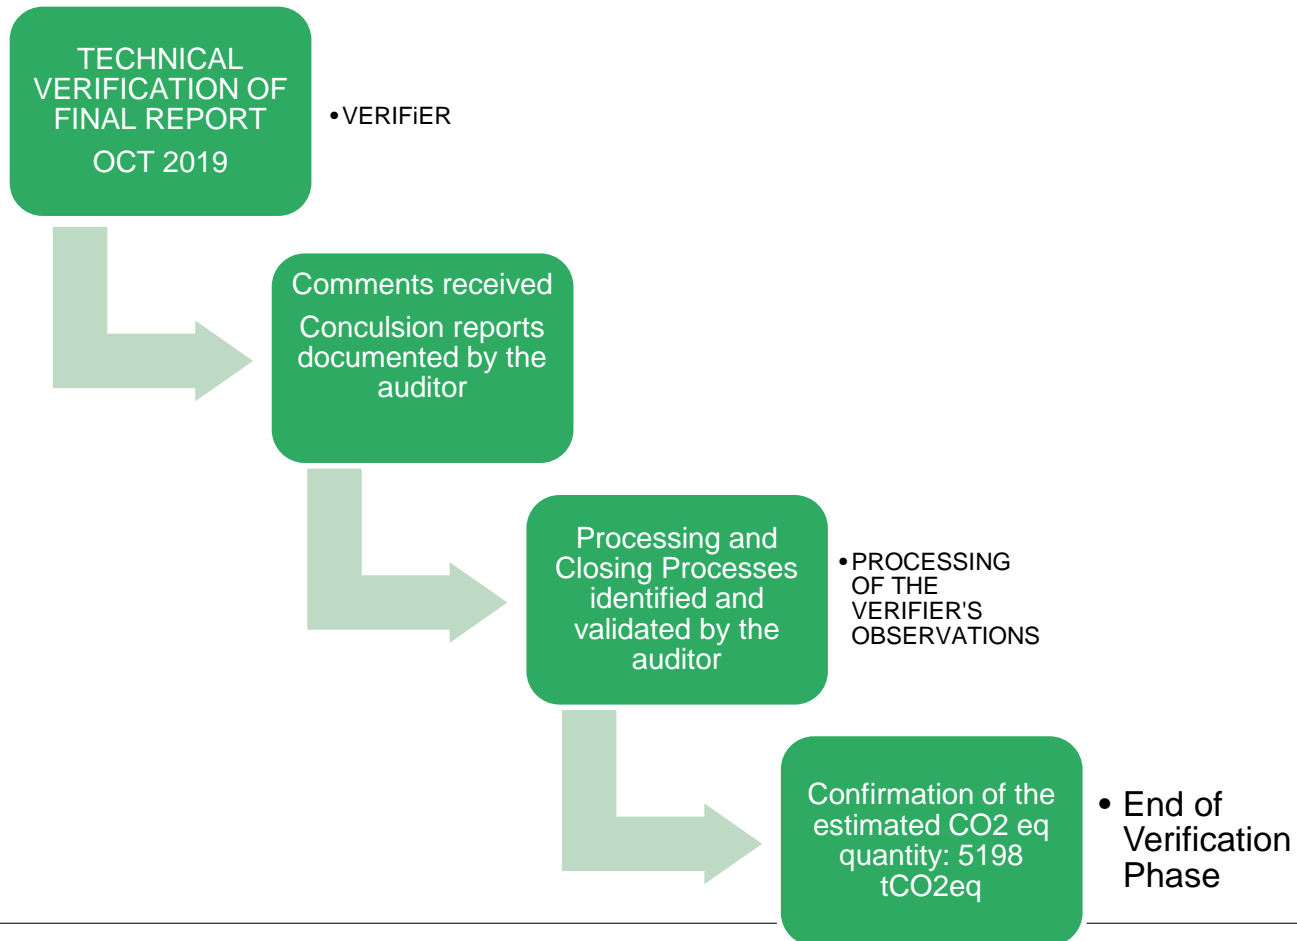

ASER RURAL ELECTRIFICATION PROGRAM

SCF REF. No. 001

Monitoring Period: 01/10/2016 to 31/03/2018
(incl. both days)

Report No: 8003001643 - 18/133

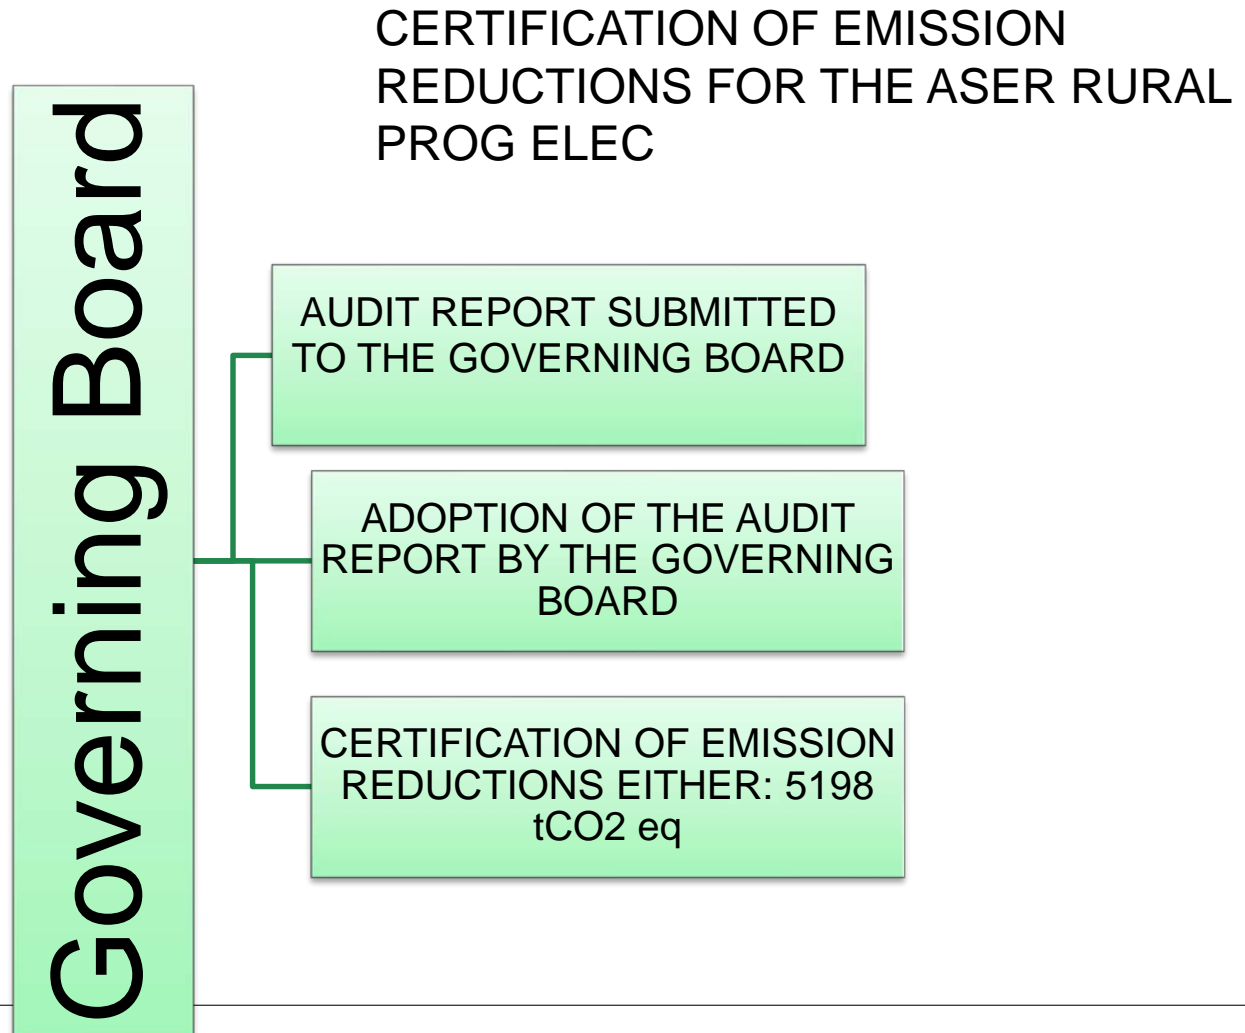

Date: 11/10/2019

Certification of emission reductions by Governing Board

- Second meeting of Governing Board convened 31 October 2019, with members of Technical Committee also invited to attend
- Verification Report provided to Governing Board and discussed with GB and TC
- While Technical Committee not formally part of Certification process, meeting provides an opportunity for experts and stakeholder to continue to learn more about the SCF process and adapt it to Senegal's needs
- Following discussion, the Governing Board decided to:
 - Acknowledge the Verification Report from TÜV Nord, which presents an unqualified positive verification opinion
 - Certify that the SCF Pilot Program has resulted in emission reductions of 5,198 tCO₂ during the period 01/10/2016 – 31/03/2018, based on the rules and procedures for the SCF pilot adopted by Senegal's SCF Governing Board

GOVERNING BOARD MEETING OF 31 OCTOBER 2019

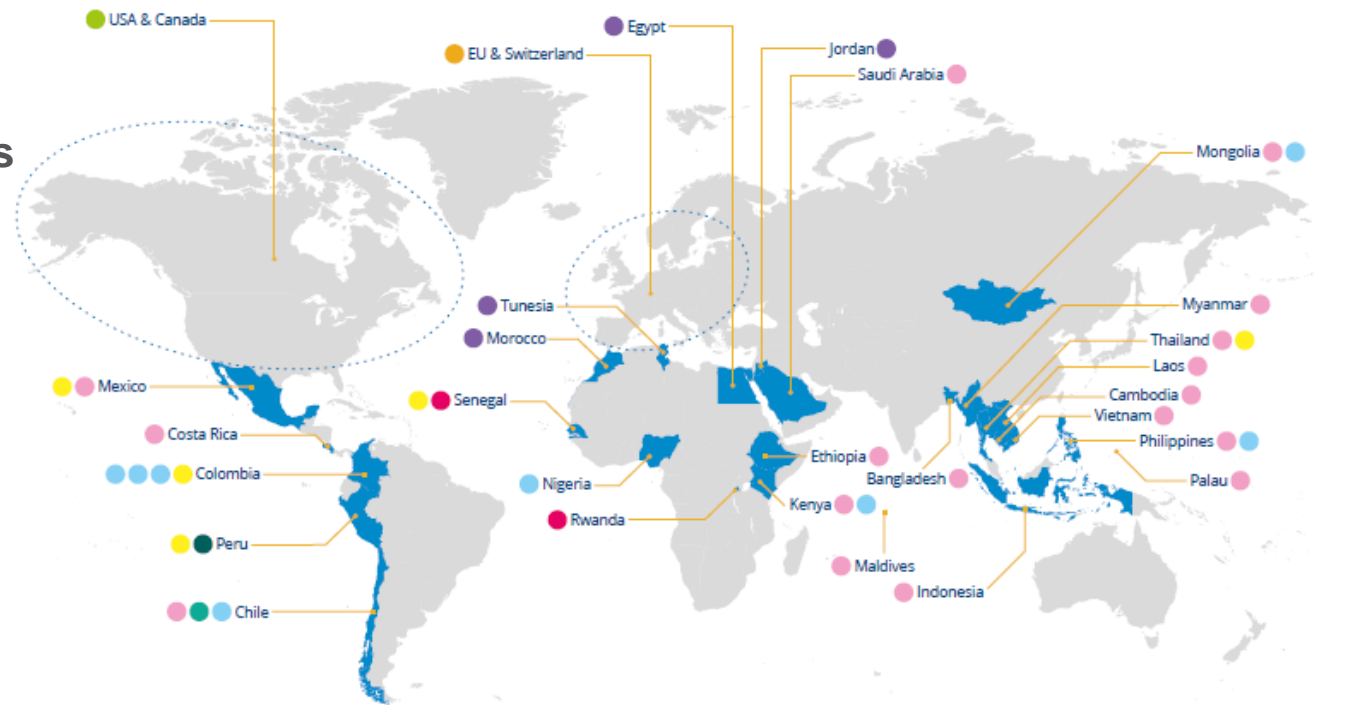

SCF Pilot in Senegal is a leader internationally

This is successful conclusion of the SCF pilot

The only Article 6 worldwide that has reached verification and certification!

Map of Article 6 pilots

SELECTION OF ARTICLE 6 PILOT INITIATIVES

- World Bank SCF
- JCM
- NEFCO
- EU / Swiss ETS Linking
- EBRD SEMED
- KliK Foundation
- SEA Virtual Pilot
- Chile-Canada Agreement
- California / Quebec Linking

Figure 2
Adapted from the study "Landscape of Article 6 Pilots – A closer look at initial cooperative approaches" commissioned by NEFCO and NICA, April 2019.

- C'est l'aboutissement réussi du projet pilote du SCF.
- Le seul article 6 au monde à avoir atteint la vérification et la certification !
